

Video reporting on missions using mobile phones and *entry-level* cameras

Your emergency package

This paper is intended solely to make you aware of a few items that may be useful to the mission team in an emergency.

Why? Here is one possible *scenario*:

- The weather is quite bad
- You and your team must leave the mission site

And where you must leave to...

- There is no electricity
- There are no Wi-Fi and no cellular (phone) services
- There are almost no support and no accommodation

A waterproof light

A light – Frem Gearlight at Amazon

There is a wide variety of lamps available. The important thing is to have at least one, especially when there is no electricity or the place where you are isn't well lit. (Watertightness is IP 67)

An emergency radio

Emergency radio receiver at Amazon

AM/FM/Weather – small solar panel and hand crank to recharge the batteries.

An optional waterproof camera

OM SYSTEM Tough TG-7 camera

Photo and video (full HD at 30 fps and 4K)
35mm equivalent lens: 25 to 100mm zoom. Audio: internal microphone.

Video reporting on missions using mobile phones and *entry-level* cameras

A CB (Citizen Band) radio

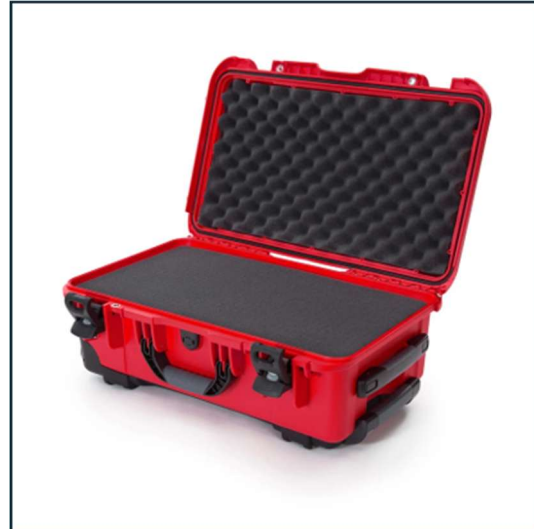

President CB transceiver

In most countries no license is required to operate a CB radio. This CB example offers AM, FM and SSB communications.

Also needed:

- Solar panel and rechargeable 12-volt battery *camping type*
- Small fire extinguisher
- Complete first aid kit
- Food and water for at least 72 hours, for yourself and every member of your team
- Personal hygiene kit
- Clothing, blankets, sleeping bags and gears to face any weather conditions.

A carrying case

Nanuk case with wheels and handle

To carry your electronic equipment, a “rugged” case is highly recommended for emergency situations.

In the service of our Lord,

Pierre
